FROM

# THE SECRETARY OF THE TREASURY,

TRANSMITTING HIS

# ANNUAL BEPORT

ON

#### THE STATE OF THE FINANCES.

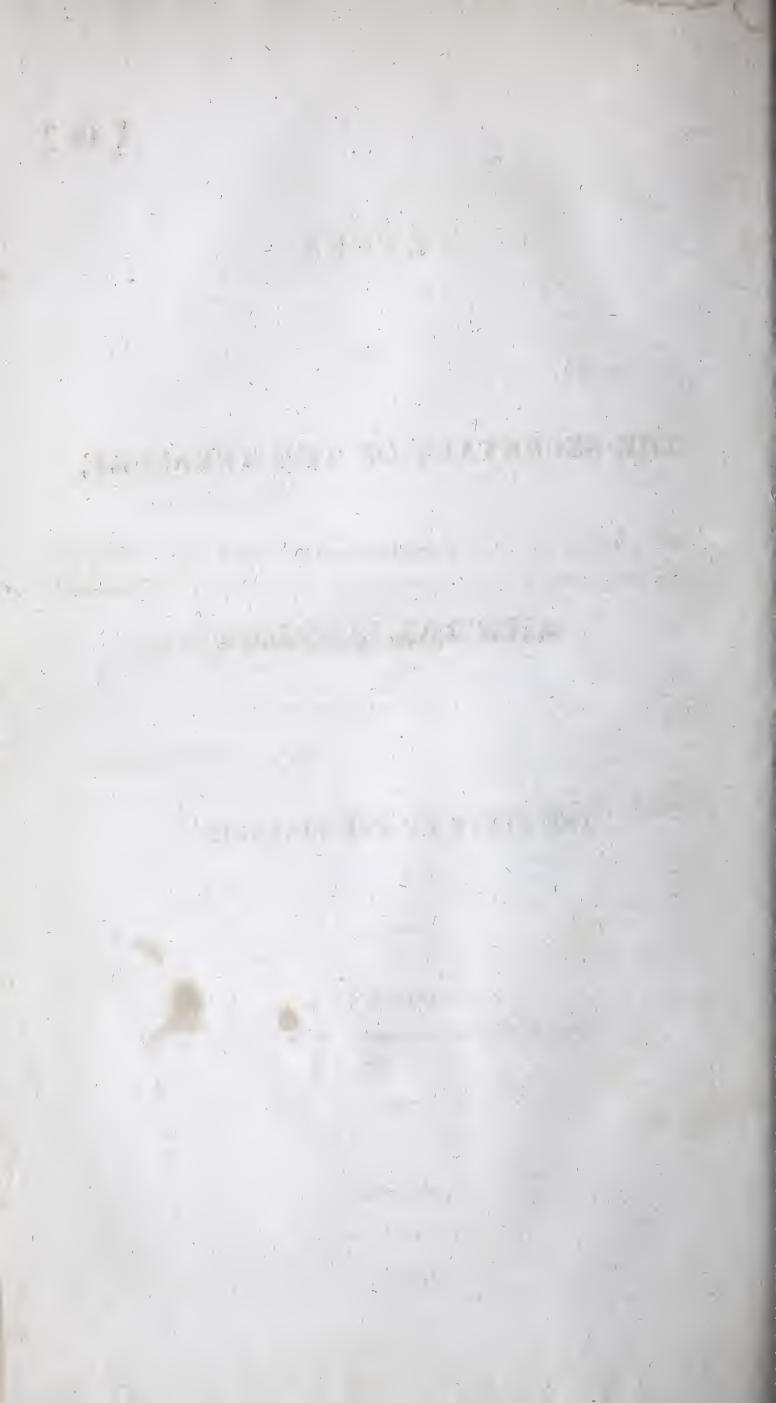

**DECEMBER 4, 1820.** 

Printed by order of the Senate of the United States.

WASHINGTON:

PRINTED BY GALES & SEATON.

1820.

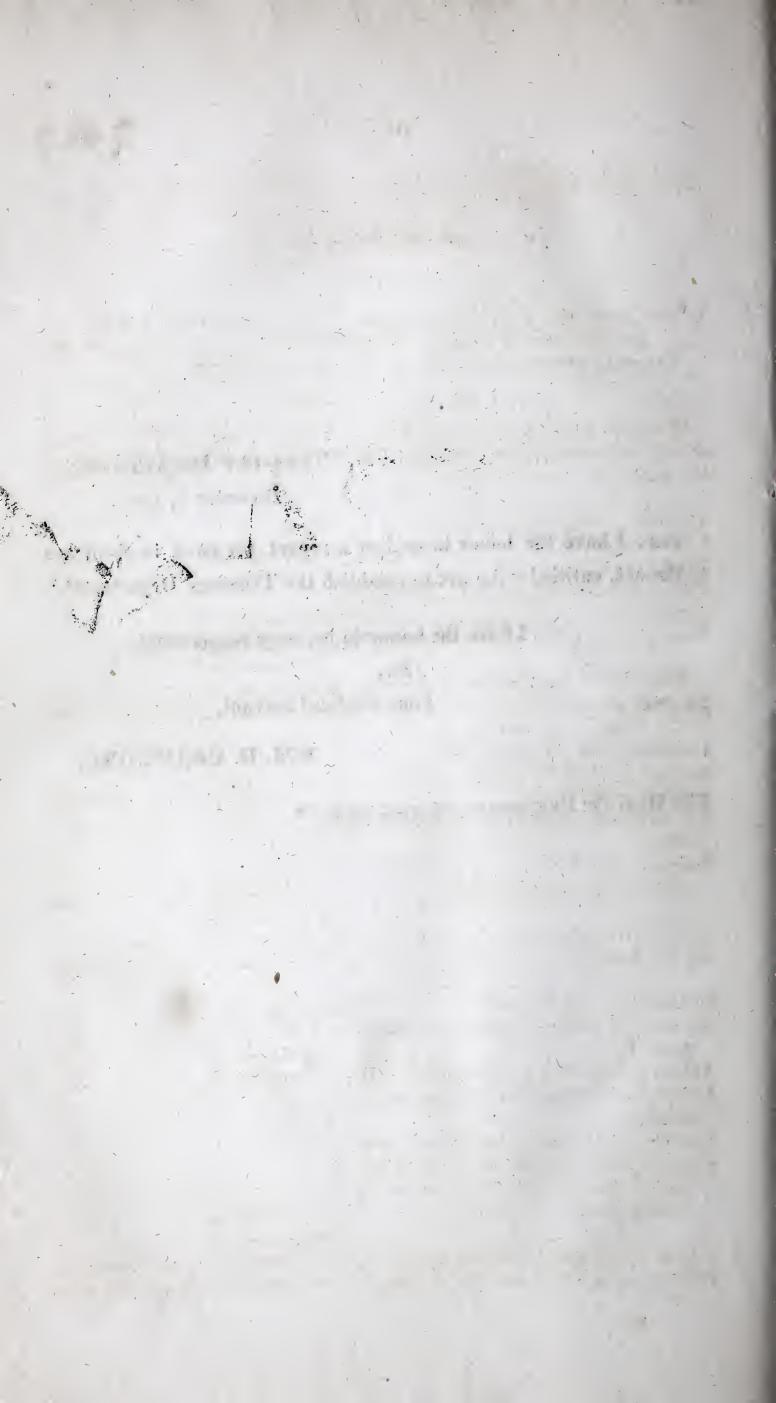

TREASURY DEPARTMENT,
December 1, 1820.

SIR: I have the honor to enclose a report, prepared in obedience to the act, entitled "An act to establish the Treasury Department."

I have the honor to be, very respectfully,
Sir,
Your obedient servant,

WM. H. CRAWFORD.

The Hon. the PRESIDENT OF THE SENATE.

#### BEPORT.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

#### 1. OF THE REVENUE.

The nett revenue arising from imports and tonnage, internal duties, direct tax, public lands, postage, and other incidental receipts, during the year 1817, amounted to - - \$24,365,227 34

Viz.		,5~ 29000 y~~ 0 E
Customs, (see statement A.)	17,524,775	15
Internal duties,	2,676,882	
Direct tax,	1,833,737	04
Public lands, exclusive of Mississipp	oi	
stock	2,015,977	00
Postage and other incidental receipts	313,855	38
That which accrued from the same	sources duri	ing
the year 1818, amounted to	<b>*</b> ***********************************	\$26,095,200 65
Viz.		
Customs, (see statement A.)	21,828,451	48
Arrears of internal duties,	947,946	33
Arrears of direct tax,	263,926	01
Public lands, exclusive of Mississipp	oi - · ·	

2,464,527

675,000 00

21,435,700 69

Postage, dividends on bank	stock, and	
other incidental receipts,	- 590,348 93	
•	/	
And that which accrued fr	om the same sources dur-	

stock,

in that Bank

And that which accrued from the same sources d	ur-
ing the year 1819, amounted to	•
Viz.	
Customs, see statement A, - \$17,116,702	96
Arrears of internal duties, see state-	
ment B, 227,444	01
Arrears of direct tax, see statement B, 80,850	61
Public lands, exclusive of Mississippi	
stock, 3,274,422	78
Postage and other incidental receipts 61,280	33
First instalment from the Bank of the	
United States, and dividend on stock	0

It is ascertained that the gross amount of duties on merchandize and tonnage, which accrued during the three first quarters of the present year, exceeds \$13,340,000; and the sales of the public lands during the two first quarters of the year, exceed \$1,240,000.

Viz.

Customs - 12,378,513 12

Public lands, exclusive

of Mississippi stock 1,124,645, 32

Arrears of internal du-

ties and direct tax 104,769 20

Incidental receipts 579,749 14

Moneys received from

loans - 2,545,431 47

Repayments - 86,529 24

And the payments into the Treasury, during the fourth quarter of the year, from the same sources, are estimated at

3,430,000 00

Making the total amount, estimated to be received into the Treasury during the year 1820 - 20,249,637 49 Which, added to the balance in the Treasury on the first day of January last, amounting to - 2,076,607 14 Make the aggregate amount of - - 22,326,244 63

The application of this sum, for the year 1820, is estimated as follows, viz.

To the 30th of September, the payments have amounted to

16,908,413 80

Viz.

Civil, diplomatic, and

miscellaneous expenses 2,078,573 25

Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to 1st of

January, 1817 - 6,043,068 00

Naval service, including the permanent appropriation for the increase of the navy

2,946,762 00

Public debt, including \$1,142,879 55, for

the redemption of the Mississippi certificates 5,840,010 55 During the fourth quarter it is esti-	39	
mated that the payments will amount		
to - 8,056,000 00

	Leaving outstanding, on the 30th September, 1820, -	699,963	26
	_		

[ 12 ]

# 3. OF THE ESTIMATES OF THE PUBLIC REVENUE AND EXPENDITURES FOR THE YEAR 1821.

In forming an estimate of the receipts into the Treasury for the year 1821, the amount of revenue bonds outstanding on the 30th of September last; the sum due for public land; the ability and disposition of the community to purchase, and especially the quantity and quality of land intended to be exposed at public auction in the course of the year, present the data upon which the calculations must be made. As a portion of the duties which accrue in the fourth quarter of the present year, and in the first and second of the next, forms a part of the receipts into the Treasury for the latter year, the amount received will exceed or fall short of the estimate by the difference between the duties which actually accrue in those quarters, and are payable within the year, and the amount at which they had been estimated.

The receipts into the Treasury may, also, considerably exceed or fall short of the sum estimated, in consequence of the issue of a greater or less amount of debentures payable during the year 1821, than had been estimated.

The degree of punctuality with which the revenue bonds are discharged, upon which the estimate is formed, must necessarily affect

the amount that will be received into the Treasury.

If the accruing revenue of the present and two succeeding quarters should exceed that of the corresponding quarters of the present and last year; if the amount of debentures which may be issued and made payable, so as to affect the receipts of the year, should be less than that of preceding years, since the peace, compared with the gross amount of duties secured within those years respectively; and if greater punctuality in the payment of revenue bonds now outstanding should be observed than during the last mentioned period, the receipts from the customs will exceed the estimates now presented; and they will fall short of it should all those contingencies be unfavorable, as has been the case during the present year.

The revenue bonds outstanding on the 30th of September last, are estimated at 18,770,000 dollars; of this sum 3,130,000 dollars are in suit; of which about 1,250,000 dollars will not be collected on account of the insolvency of the debtors; leaving the amount of bonds outstanding, upon which collections are to be made, estimated at 17,520,000 dollars. The amount of duties secured during the 1st, 2d, and 3d, quarters of the year 1820, is estimated at 13,350,000 dollars; and that of the whole year may be estimated at 16,500,000 dollars. The amount of debentures outstanding on the 30th of September, and payable during the year 1821, is estimated at \$1,162,114 16, which is subject to be increased by the amount issued in the present quarter, and during the whole of the ensuing year chargeable upon the revenue of that year. The annual average amount of debentures, bounties, and allowances, and expenses of collection, chargeable upon the revenue, has been ascertained to be nearly equal to 15

per cent. of the annual average amount of the duties upon imports and tonnage, which accrued from the year 1815 to the year 1819, inclusive.

If this proportion be applied to the revenue bonds outstanding on the 30th of September last; and if the receipts from the tonnage of vessels, and upon duties, secured during the present and the two succeeding quarters, are assumed to be equal to any deficiency resulting from the want of punctuality in the discharge of the outstanding bonds; the receipts into the Treasury, for the year 1821, from this

source of revenue, may be estimated at \$14,000,000.

The receipts into the Treasury, from the public land, during the three first quarters of the present year, are estimated at 1,124,645 32, and those of the entire year will probably not much exceed 1,600,000. The receipts from that source, during the year 1821, will probably not exceed those of the present year, if no incentive to greater punctuality, or inducement to make prompt payments, should be presented to the public debtors, in the course of the present session of Congress.

The balances of internal duties and direct tax, still outstanding, are so considerable as to justify an estimate of some extent, in calculating the receipts of the ensuing year, if the difficulty of enforcing payment, in those states where the largest amount is due, were not known to be great. Under these circumstances, the receipts from that

source, for the ensuing year, are estimated at \$100,000.

According to the foregoing data, the receipts into the Treasury,

for the ensuing year, may be estimated as follows, viz.

Customs - - - 14,000,000

Public lands, exclusive of Mississippi stock 1,600,000

Arrears of internal duties and direct tax,

and incidental receipts - 100,000

Third instalment from the Bank of the

United States - - 500,000

Bank dividends, which may accrue during the year, estimated at five per cent.

Making the aggregate amount of - 350,000

16,5

The appropriations for the same period

are estimated as follows, viz.

Civil, diplomatic, and miscellaneous 1,769,850 04

Military department, including fortifications, ordnance, Indian department, military pensions, and arrearages prior

to the 1st of January, 1817 - 4,585,352 61

Naval department - 2,420,594 56

Making an aggregate of

\$8,775,797 21

16,550,000 00

But, to determine the amount of the charge upon the Treasury, for the service of that year, the following additions must be made, viz: 1st. Civil, diplomatic, and miscellaneous, the sum of £1,500,000; being an amount of appropriations, of the present and preceding years, unexpended, and which may be expended during the year 1821, and the sum of \$5,477,770 76, payable on account of the interest, and reimbursement of the principal, of the public debt during that year.

2d. The unexpended balances of appropriations for the War Department, under the different heads already enumerated, and which have been deducted from the estimates, or not included in them, (as in the case of revolutionary pensions, because the balance of that appropriation is estimated to be equal to the expenditure on that object, during the ensuing year) amounting together to \$2,507,267 63.

The annual appropriation of 200,000 dollars, for arming the militia; and the Indian annuities, not embraced by the estimates, amount-

ing to 152,575 dollars.

3d. The annual appropriation of 1,000,000 dollars, for the gradual increase of the navy, which will expire in the year 1823; and an unexpended balance on the same account, which may be expended in 1821, of 1,750,000 dollars.

According to the foregoing data, the expenditure of the year 1821, and which is chargeable upon the Treasury during that year, may be

estimated as follows:

Viz.		
Civil, diplomatic, and miscellaneous,	3,269,850	04
Public debt,	5,477,777	76
Military department, including forti-		
fications, ordnance, Indian depart-		
ment, military and revolutionary		
pensions, arrears prior to the 1st of		٠
January, 1817, and arming the mi-		
litia, and Indian annuities,	7,445,195	24
Navy department, including the sum		
of 1,000,000 dollars, for the gradual		
increase of the navy,	5,170,594	56
Making an aggregate charge upon		
the Treasury for the year 1821 of	21,363,417	60
To which add the balance against the		
Treasury on the 1st day of January,	0.	
1821,	2,638,169	17

Making, 24,001,586 77 Leaving a balance of \$7,451,586 77, beyond the estimated means,

for which provision is to be made.

To determine whether a deficiency to this, or any other amount, will occur in succeeding years, is extremely difficult. The data furnished by the fiscal operations of the government since the peace, must be principally relied upon, in making the calculations necessary to arrive at any general result upon the subject.

[ 12 ] 12

It has been ascertained that the nett revenue which has accrued from imports and tonnage from the year 1815, to 1819, inclusive, has amounted to \$120,260,052 46. If this be divided by the number of years in which it accrued, the result will be an annual average revenue of 24,052,000 dollars. But the revenue which accrued in 1815, greatly exceeded, not only that of any year previous to the war, but that of any year since that epoch. It is also admitted, that the quantity of produce on hand at the close of the war, especially of cotton and tobacco, considerably exceeded the amount of the crop of those articles made during the preceding year. The ability of the community, therefore, to purchase an increased amount of foreign articles in the year 1815, exceeded, in a corresponding degree, that of subsequent years. It has also been ascertained that the importation of foreign articles during the present year has been considerably less than in any year since the peace. To form an estimate of the average annual revenue, which may accrue from imports and tonnage during the next four years, that will approximate towards accuracy, it will be necessary to embrace in the calculation the revenue which accrued from the year 1814 to 1819, inclusive, amounting to \$124,510,414 05, and that which shall have accrued in the year 1820, estimated at 14,000,000 dollars, making the aggregate sum of \$138,510,414 05, which gives the sum of 19,787,202 dollars, as the

annual average revenue for those seven years.

Other views, derived from the fiscal operations of the government, will be found to accord with this result. The average product of the duties upon imports and tonnage which accrued from the year 1801 to 1807, inclusive, may be stated at 13,640,000 dollars, and that which accrued from the former period to 1813 inclusive, amounted to the annual sum of 11,570,000. The increase of population in the United States has been estimated at 34 per cent. in ten years. If the increase of consumption has corresponded with that of population, the revenue of the year 1820, according to the result furnished by the first seven years, would exceed 20,000,000 dollars; and would fall but little short of 17,000,000 dollars, according to the data furnished by the whole During the former period, the principal states of Europe were involved in wars, which not only gave to our shipping the principal part of the carrying trade, but created an unusual demand for every article of exportation, and greatly enhanced their value. estimate founded upon the average revenue of those years, the duties upon imports remaining the same, would most probably not be realized; but, as these duties were considerably increased in 1816, the objections to such an estimate are in some degree diminished. From the year 1808 to 1813 inclusive, the United States were engaged in a state of commercial or actual warfare. The disadvantages to which their commerce was subjected by that warfare, more than counterbalanced the peculiar advantages it enjoyed in the seven years immediately preceding. An estimate for the next four years, founded upon an average of the whole term, would more probably fall short of, than exceed, the

13 [ 12 ]

sum which would be received into the Treasury, notwithstanding the duties were higher during two years of that term, than at present.

In the investigation of a subject of such complexity, affecting so deeply the interest of the community, every fact and circumstance connected with it ought to be considered. Since the year 1807, new interests have arisen, which claim a prominent place in this consideration. From time immemorial, household manufactures have existed in every part of the United States. The mechanical arts, those branches of manufacture without which society, even in a very imperfect state of civilization, could not exist, though differing in some degree from those properly denominated household, have long existed in the United States. Since the year 1807, those branches of manufacture have been greatly extended and improved. Others have been established, and a large amount of capital has been invested in manufacturing establishments, which promise to furnish, in a short time, an ample supply of cotton and woollen manufactures, and most of those of iron, glass, and various other articles of great value.

As commerce has been properly defined to be an exchange of equivalent value, it is probable that the failure, on our part, to receive from foreign nations the accustomed supply of those articles which can now be produced in our domestic establishments, the articles which they have been accustomed to receive from us will lose something of the value which they would otherwise have commanded, until new channels of intercourse shall be discovered, and different articles of

merchandize shall be substituted for those formerly received.

The capacity of a nation to consume foreign articles depends upon the value of its exports, and not upon its ability to furnish every article of prinary or secondary necessity. The precious metals are never imported into any country when commodities, which will command a profit, can be obtained for importation. Giving full weight to the fact, that cotton, woollen, iron, and various other articles which are now furnished by our domestic establishments, will be hereafter received from foreign nations only to a small amount, 17,000,000 dollars of revenue may be assumed as the minimum, and 20,000,000 dollars as the maximum, which will be annually received from imports and tonnage during the next four years. The decrease which has occurred in the last and present years, furnishes no ground to distrust the correctness of the foregoing conclusion. The customs produced in 1815 a nett revenue of \$36,306,022 51, in 1816, \$27,484,100 36, and, in 1817, \$17,524,775 15. This last year was considered, at the time, as the period of greatest reaction. Accordingly, in 1818, the nett revenue from the customs amounted to \$21,828,451 48.

The multiplication of banks, the state of the currency, and the high price which all exportable articles commanded, until the end of 1818, strongly invited to extravagance of every kind, and particularly in the consumption of foreign merchandize. The resources of individuals had been, by these seductions, in a great degree anticipated, during the first years which succeeded the peace. The sudden reduction in the value of all exportable articles, which occurred about

the commencement of the year 1819, not only prevented, in a great degree, further purchases, but rendered the discharge of engagements previously contracted, impracticable. The pressure thus produced upon the community reacted upon the venders of every species of merchandize, whether foreign or domestic; who, without thoroughly investigating the cause of their distress, have sought for relief in measures calculated rather to aggravate, than alleviate, the public embarrassment. The issue and payment of a larger amount of debentures, in the present year, in proportion to the exportations of the last; the increased amount of specie, and diminished amount of foreign merchandize imported during the present year; and, the ready sale of foreign and domestic articles now in the market, show, that the importation of foreign goods is upon the eve of being regu-

lated by the demand for them, for consumption.

It has been stated, that the receipts from the public land, during the year 1821, cannot be estimated at more than \$1,600,000, unless some greater incentive to punctuality, or inducements to make prompt payments, should be offered, by the measures which may be adopted in the course of the present session of Congress. The act of the 24th of April last, which abolished credit on all purchases of land, and reduced the minimum price from 200 to 125 cents per acre, furnishes, it is respectfully conceived, equitable ground for legislative interference, in favor of purchasers under the ancient system. By that system, the price could be reduced to 164 cents per acre, by prompt payment. If the act, establishing credit, had fixed the minimum price at 164 cents, instead of 125 cents, no equitable ground for legislative interference could exist. It is not contended, that the vender of an article, under ordinary circumstances, does an injury to a purchaser, by subsequently selling the same article to others, at a lower rate. But, if he has in his possession such a quantity of the article sold, as to enable him, for an indefinite time, to determine the price of the article, he affects the interest of every previous purchaser by such reduction, who may be constrained, from any cause whatever, to sell that article. The extent of the national domain will, for ages, enable the government to determine the price of unimproved lands, similarly situated. It is admitted, that the government has been induced to adopt this measure, by the most grave considerations. The most prominent of these, was the necessity of preventing the further increase of a debt, then about \$22,000,000, strongly affecting the interests and feelings of a great number of citizens. If its increase was an object of deep solicitude, its diminution, by an act of grace, founded upon equitable principles, will be in strict accordance with the motives in which that measure originated. Difficulties may occur in adjusting the details of such a measure, unless it be presented as a simple act of grace. Under this point of view, it should be confined, in its operation, to the debtors of the government for public lands; and, should affect them only to the extent of the debt which they may respectively owe.

During the excessive circulation of bank notes, not convertible in-

15 [ 12 ]

to specie, and to which the government, from necessity, for some time gave currency, and the high price which every description of domestic produce commanded, large quantities of public land were sold at public auction, at prices greatly beyond their real value. In many instances, the first payment which the government has received, could not be obtained by the purchaser, if he were able to convey the land in fee simple. The propriety of legislative interference, to change, the relations between debtor and creditor, for the benefit of either, may well be questioned. Circumstances, however, may arise, which will influence an upright and benevolent creditor to relax his demands, and to grant relief to his debtor, voluntarily, which he might resist as an act of power. Such, it is respectfully conceived, is the situation of the government, in relation to the purchasers of public land, who, in a moment of infatuation, have engaged to pay for a portion of the national domain a sum greatly beyond its value, and which will never be paid. In all cases of this kind, the forfeiture of the sum already advanced will inevitably occur, if relief, to some extent, is not granted.

In conformity with the foregoing views, the following propositions for the relief of the purchasers of public land, and for the purpose of increasing the payments into the Treasury, in the ensuing year, are

respectfully submitted.

1. That every purchaser of public land be permitted, on or before the 30th of September next, to abandon any legal sub-division of his purchase; and, that the payments made upon the part abandoned be applied to the discharge of the instalment due upon the remainder; the right to abandon, in no case, to involve any repayment by the government to any purchaser. In all cases, the part retained, to be in the most compact form that the situation of the whole quan-

tity purchased will permit.

2. The difference between the former and present minimum price for cash payment being equal to 23.78 on the former, it is respectfully proposed, that, on payment of the whole purchase money, for any tract of land, on or before the 30th day of September next, a deduction of twenty-five per cent shall be made, and that any interest which may have accrued to the United States, in such cases, shall be remitted. An act of greater liberality, and which would still further increase the receipts into the Treasury, during the next year, would be to allow a deduction of  $37\frac{1}{2}$  per cent. on all such payments, which is equal to the difference between 200 and 125 cents.

3. That all sums which may be due by purchasers of public lands, who shall not avail themselves of the preceding conditions, shall be payable in ten equal annual instalments, without interest; provided that such payments shall be punctually made, upon the several days, in each successive year, upon which the purchases were respectively made; any failure in making such payments, to revive the original terms and conditions of sale.

If these, or analogous, provisions, should be adopted, the payments from the public land, during the year 1821, will be greatly increased; the debt due on that account greatly diminished; and the revenue resulting from that source acquire, in future years, a more uniform

If, then, it be assumed that the revenue which will accrue from the customs will be equal to the mean sum, between seventeen and twenty millions of dollars, the annual revenue for the four succeeding

years may be estimated as follows, viz.

Customs 18,500,000 Public lands 2,500,000 Bank dividends, at six per cent. 420,000 Incidental receipts 80,000

Making an aggregate of

But, if the annual receipts from the customs shall be estimated, for the next four years, at the average sum of \$17,000,000, the annual revenue for that period will be equal to 20,000,000 dollars.

The annual expenditure, for the same period, may be estimated as

follows, viz.

Civil, diplomatic, and miscellaneous 2,000,000 Public debt 5,477,000

War Department, including fortifications, ordnance, Indian department, military and revolutionary pensions, arming the militia, and arrears prior to the 1st of

5,859,000 January, 1817

Naval Department, including \$1,000,000

for the permanent increase of the navy 3,420,000

Making the aggregate amount of \$16,747,000

The balance of the sinking fund, after paying the interest of the funded debt, and providing for the annual reimbursement of the six per cent. deferred stock, has not, in this estimate, been considered as a charge upon the Treasury, before the year 1825; as the price of the public stocks precludes the possibility of purchase within the rates prescribed by law.

This estimate is below that which is required for 1821, but is believed to be less than the annual expenditure which will be required for the next four years. According to this estimate, the means will exceed the indispensable expenditure, during that period, 3,253,000

dollars.

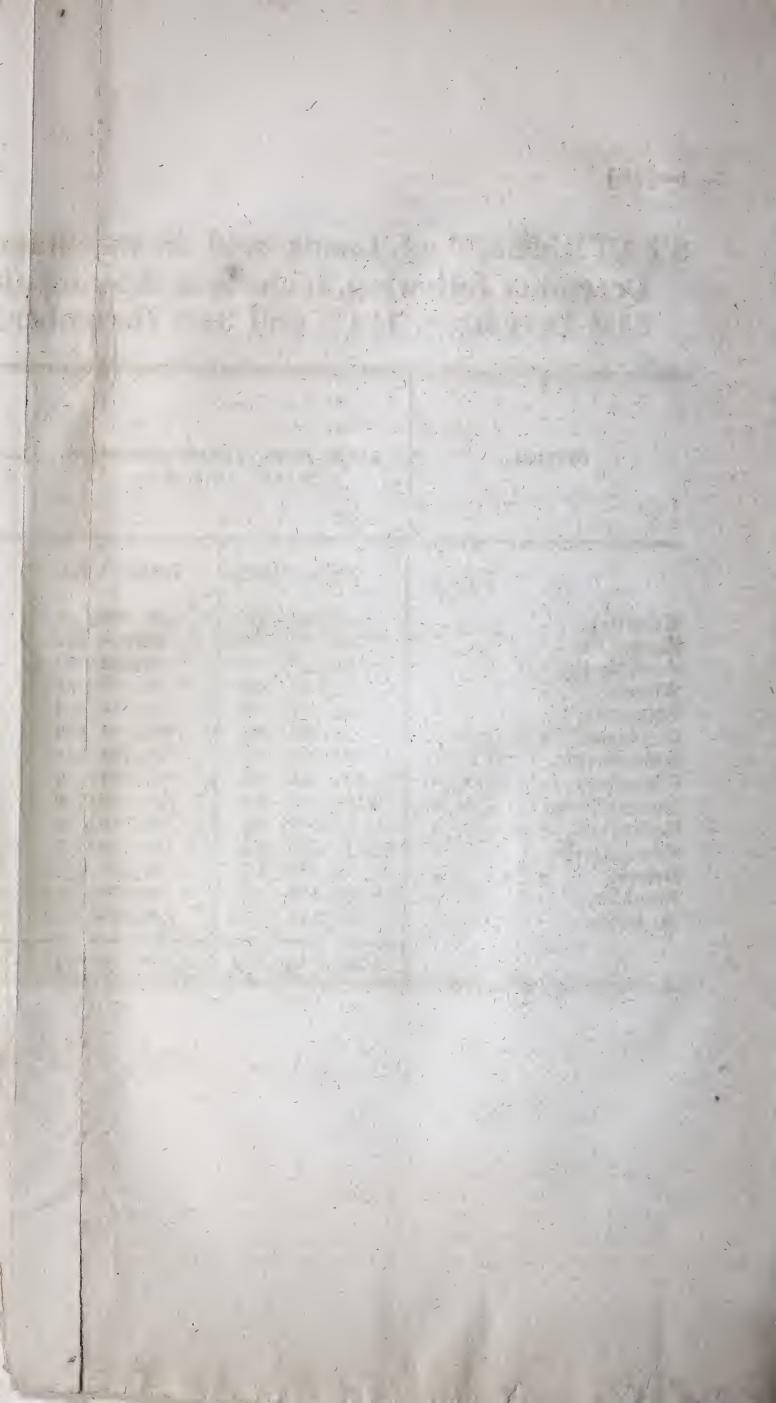

After the year 1823, the annual expenditure upon the navy will be The expenditure of the governdiminished by 1,000,000 dollars. ment, after that year, including the entire appropriation for the public debt, is estimated as follows, viz.

Civil, diplomatic, and miscellaneous - \$2,000,000 Public debt 10,000,000 STATEMENT of Lands sold in the States of Ohio, Indiana, Illinois, Missouri, ad in the Territory of Michigan, from the 1st of January, 1819, to the 31st of December following, inclusive; showing also the receipts from Individuals and paments made by Receivers during the same time, with the balances due both on 31st December, 1818, and 31st December, 1819.

GENERAL LAND OFFICE, 15th November, 1820.

JOSIAH MEIGS, Commissioner.

Military Department, including fortifications, ordnance, Indian Department, military and revolutionary pensions, arming the militia, and arrearages prior to the 1st of

January, 1817 - - 5,850,000 Naval Department - - 2,420,000

Making the aggregate amount of - 20,270,000 which, after the year 1824, would leave an annual deficit of \$270,000.

If this sum should not be met by the annual increase of revenue, resulting from the increase of population during these and succeeding years, and the increased consumption of foreign articles resulting therefrom, it may be supplied by a corresponding reduction in those items of expenditure which depend absolutely upon the will of the legislature, unconnected with the existing laws regulating the perma-

nent expenditure.

It is, therefore, respectfully submitted, that it is inexpedient to resort, at this time, to the imposition of additional taxes upon the community. The condition of the currency, in several of the states of the Union, furnishes strong inducements to abstain from additional taxation, at this time. The obligation of the government to receive the notes of the Bank of the United States, without reference to the place where they are payable, has given to them their universal currency. All notes issued south and west of Washington have, in consequence of the state of exchange between these places and the commercial cities to the east of this place, centered in those cities. The Bank has consequently found itself constrained to direct those branches to refuse to issue their notes, even upon a deposite of specie. The effect of these causes, combined, has been, the exclusion from circulation, in all the states west and south of the seat of government, of the notes of the Bank of the United States and its offices. In several of those states there is no sound paper circulation. To resort to internal taxation, under such circumstances, would be to require of the citizens of those states, what will be impossible for them to perform. Wherever paper circulates as money, which is not convertible into specie, it circulates to the exclusion of specie and of paper, which is convertible into gold and silver coin. In all such places, the payment of direct or internal taxes in specie, or in the notes of the Bank of the United States, will be impracticable. Preliminary to a resort to internal taxation of any kind, the charter of the Bank of the United States ought to be amended, so as to make the bills of all the offices of the Bank, except that at the seat of government, receivable only in the states where they are made payable, and in the states and territories where no office is established. The effect of this modification would be, to make the notes of the offices of the Bank of the United States, except the office in this District, a local currency, which will enter and continue in the local circulation of the states in which they are issued. The notes thus issued will render the local circulation of all the states sound, and furnish to the citizens the means of discharging their contributions to the government. This measure

will also place the state institutions, to the south and west of this city, in a more eligible situation, in relation to the offices of the Bank of the United States, by enabling them to adjust their accounts with those offices by the exchange of notes, instead of liquidating their balances by the payment of specie. Should it, however, be judged expedient by the legislature to lay additional burthens upon the people for the purpose of meeting the existing or any probable future deficiency, it is respectfully submitted, that the importation of foreign spirits be prohibited, and that a duty upon domestic spirits, equal to the amount of that now collected upon foreign spirits and to such deficiency, be imposed on the distillation and sale of domestic spirits. In any event, a resort to loans, to the extent of the deficiency for the year

1821, will be indispensable.

Of the sum of \$3,000,000, authorized by the act of the 15th of May last, to be raised by loan, \$2,000,000 have been obtained at a premium of two per cent. upon stock bearing interest at the rate of six per cent. per annum, redeemable at the will of government; and \$1,000,000 at par, upon stock bearing interest, at the rate of five per cent., redeemable at any time after the first day of January, 1832. There is no just reason to doubt, that any sum, which may be necessary to be raised by loan, can be obtained upon terms not less favorable; but, as it is probable, that the surplus of the revenue, after satisfying all demands upon the Treasury, authorized by existing laws, during the years 1822, 1823, and 1824, will be equal to the redemption of any debt which may be contracted in 1821, it is respectfully submitted, that the President of the United States be authorized to borrow, from the Bank of the United States, or from other banks or individuals, the sum which may be necessary for the service of that year, at par, and at a rate of interest, not exceeding six per cent. per annum, redeemable at the will of the government.

All which is respectfully submitted.

WM. H. CRAWFORD.

TREASURY DEPARTMENT,

December 1, 1820.
